

## saver Series

The saver range of Emergency Escape Breathing Apparatus offers two styles and both have been designed using the latest technologies available whilst bearing in mind three leading principles:- reliability, quality and ease of use.

The **saver PP** positive pressure emergency escape breathing apparatus is designed to provide safe and unhampered escape from hazardous environments where breathing has become difficult or endangered using a positive pressure mask.

The **saver CF** constant flow hooded emergency escape breathing apparatus allows safe, effective and uncomplicated escape from hazardous environments with minimum training.

### The saver range offers:-

- Choice of 2 durations 10 or 15 minutes
- Automatic activation
- High visibility carry bag
- Clear visible contents gauge
- Warning whistle to notify of low air content
- Full range of accessories available
- CE0088

### The PP offers:-

- Improved breathing characteristics
- First breath activation
- Self demisting visor

### The CF offers:-

- Long life neck seal
- Low cost of ownership
