

Tripods and Davits

We offer a wide range of Tripod, Davit, hoist and rescue systems to ensure safe entry and exit from all types of confined spaces.

G-Tripod

Used with the G-Saver II to protect personnel descending into or leaving a confined space and with the G-Winch for lowering and raising personnel, the G-Tripod has been designed to give a secure and stable anchorage for the G-Range of safety products. There are two anchorage points allowing the use of a secondary back-up fall arrester, or other types of lifting / safety equipment.

- Weight 18Kg
- Enclosed overhead pulley
- SWL 136Kg

UCL Tank Pod

Designed to mount to tank & vessel manways with existing hardware for securing hatchways, mounts to manway flanges from 19" to 36". Features:-

- 3 independently adjustable legs
- Accommodates tank inclinations up to 45°
- Lightweight anodised construction
- Plastic bearings at all adjustment points
- It can be fitted with a variety of winches, FAB's & ladders
